PIARC's work on Resilient and Sustainable Pavements

MARGO BRIESSINCK - Civil engineer in the field of construction. He graduated in 1992 from the University of Leuven in Belgium. Since 1996, he has been working for the Agency for Roads and Traffic of the Flemish region in Belgium, currently as senior advisor on road structures. His expertise ranges from road design over surface characteristics to asset management systems. He is member of CEN TC 227 "Road materials" and WG 5 "Surface characteristics". Margo is the current chair of PIARC TC 4.1 "Pavements".
